**ASKO Appliances achieves another industry milestone with the introduction of the first outdoor dishwasher**

*ASKO Appliances introduces the outdoor chef's perfect companion to their outdoor kitchen, making cleaning a breeze.*

ASKO Appliances Inc., the global manufacturer of ecologically friendly dishwashers and laundry products proudly announce the addition of the D5934 Outdoor dishwasher. It's specifically designed to withstand the harsh conditions of the outdoor with advanced testing and special attention to internal components. It is packed with the quality features that have made ASKO the dishwasher of choice for designers, architects and

consumers for over 23 years in North America.

The D5934 Outdoor features a complete brushed stainless steel exterior cabinet that is suitable for built-in or free standing installations. The interior features a quality 18:9 stainless steel tank, patented 7Spray™ washing system with a dedicated PowerZone™ system to focus on tough to clean items and a knife rack with dedicated wash system. It uses as little as 3.8 gallons of water. The exclusive racks with height adjustability featuring the industry's tallest loading height of 15 ¼" are designed to accommodate items such as large platters, tall cooking utensils, pots, pans, plates and all types of glasses. The exclusive upper rack accommodates 5 rows of glasses for those large gatherings. It even comes with a special program to winterize the dishwasher before the cold season appears.

The D5934 Outdoor will be available in the summer season of 2011 and retail for \$3999.00.

"ASKO is proud to bring yet another industry first to the North America marketplace with this unique outdoor cleaning product," said Steve Piro, President
